SUMMARY

I'm a certified Software Engineer with over **7** years of experience designing, developing, and deploying software solutions at scale. My work spans **AI-driven platforms, Law Enforcement Agencies, SaaS applications, financial systems, Healthcare solutions and E-commerce solutions.** Always with a focus on clean architecture, security, and long-term maintainability.

My core stack includes **Python, Django, FastAPI, .NET Core, AWS, GCP, and Azure**. I've led cross-functional teams, optimized **high-traffic system architectures**, and built robust codebases that teams can confidently extend and maintain. I hold **advanced certifications from Micro1** and bring strong problem-solving and communication skills to every project.

Looking ahead, I'm focused on intelligent, agent-driven platforms and scalable SaaS products combining modern **AI capabilities** with modular, production-grade engineering.

EXPERIENCE

Principle Software Engineer Aug '25 — Present
Radity Zurich, Switzerland (Remote)

- **Improved system reliability** by implementing robust error handling for third-party integrations (Socotra, Stripe, Auth0), reducing 503-related failures by **99%**
- **Reduced API response times by 80%** by optimizing PostgreSQL queries and eliminating N+1 issues across policy management endpoints.
- **Architected and delivered 100+ RESTful APIs** using Django REST Framework for policy lifecycle management, quote processing, and claims workflows
- **Scaled platform to support 2M+** active users through PostgreSQL optimization (indexing, connection pooling, read replicas), Redis caching, Celery-based async processing, and horizontal scaling with load balancing

Senior Software Engineer Jan '23 — Aug '25
Datics AI Lahore, Pakistan

- **Designed and implemented AI pipelines** for **sentiment analysis**, call **outcome classification**, and **entity extraction**, enabling automated insights from **100K+** conversations daily
- **Integrated 6 third-party VOIP providers** (GoTo, Bandwidth, Netsapiens, RingCentral, NexHealth, Weave) with real-time webhook-based call data ingestion
- **Built data aggregation pipelines** using Python and web scraping, consolidating US-based data sources to serve **1,000+ dealerships** nationwide.
- **Implemented Web Application Firewall (WAF)** to secure high-traffic e-commerce platforms, blocking 10K+ malicious requests daily and reducing security incidents by **98%.**
- **Engineered GCP Cloud Functions** to process call transcripts and extract **actionable insights**, powering Peerlogic's AI analytics platform.
- **Established CI/CD pipelines** with GitHub Actions, reducing deployment time by **85%** and ensuring reliable release cycles
- **Architected scalable backend systems** using Django and DRF for 3 high-impact products: Law Enforcement platforms, SecureTaxOffice (**fintech**), and Peerlogic (**conversational AI**)
- **Configured production-grade AWS infrastructure** for high availability, scalability, and seamless deployments across multiple projects.
- **Secured high-value financial transactions** on SecureTaxOffice, implementing robust backend operations and **compliance-ready architecture.**
- **Improved API response times by 90%** on SecureTaxOffice by implementing PostgreSQL **materialized views** for complex financial reporting queries.
- **Mentored 5 junior engineers**, accelerating their technical growth and contributing to team-wide skill development.

Software Engineer Feb '19 — Dec '22
Devsinc - Middle East and Africa Lahore, Pakistan

- **Delivered end-to-end e-commerce solutions** spanning **30+ modules** including order management, logistics, inventory, and fulfillment driving **60% revenue growth** for major retail clients.
- **Designed custom payment gateways** capable of processing **millions of requests daily** for Pakistan's largest e-commerce brands.
- **Built Shopify middleware and order aggregation systems** using .NET Core, automating **Omni channel** order processing for **130+** online retailers.
- **Solely architected and implemented logistics platform** for Leopards Courier (Pakistan's leading courier service), powering shipment tracking, route optimization, and delivery management for **12M+** parcels **annually**

- **Developed dropshipping platforms and logistics tools** that streamlined fulfillment operations, reducing manual processing time by **80%.**
- **Engineered marketing automation tools** enabling retailers to scale campaigns and track performance across multiple sales channels.
- **Architected IoT automation systems** with automated device provisioning and real-time control, managing **100+** connected devices

SKILLS

Top Skills Python, Django, FastAPI, DRF, PostgreSQL, Docker, AWS, GCP, Azure, .Net Core, LangChain, LangGrapgh, NumPy, pandas, MySQL, MSQL, CrewAi, Vanna Ai, Artificial Intelligence
Languages English

EDUCATION

Bachelor's degree, Computer Software Engineering in Computer Software Engineering, Superior University Lahore (GPA: 3.4) — Jan '14 — Dec '18, Lahore, Pakistan

Intermidiate , Pre-Engineering in Pre-Engineering, Standard College Lahore — Jan '11 — Dec '13, Lahore, Pakistan

CERTIFICATIONS

Certified Principle Software Engineer, micro1
